Verification of Sea Vegetable Propagule Status

Variety: _____

Supplier: _____

Dear Supplier,

In order for a non-organic propagule to be used for growing cultivated sea vegetables we are required to obtain the following information regarding the production and handling of the propagules.

The National Organic Standards state:

To be sold or labeled as "100 percent organic", "organic", or "made with organic ingredients", the product must be produced and handled without the use of excluded methods, which are defined as genetic modification, ionizing radiation, and sewage sludge. (References: 7 CFR §205.105(e,f,g) and §205.301(f)(1,2,3)).

Your signature below verifies that the above referenced product is produced and handled without the use of:

- Genetic Modification
- Ionizing Radiation
- Sewage Sludge

In addition, if you are producing propagules beyond the male and female gametophyte stage:

- Conventionally raised male and female gametophytes were transferred to pure seawater or an approved growth medium prior to fertilization and production of propagules.
- Only products approved by MCS to be consistent with National List of approved and prohibited substances listed in NOP 205.601 and 205.602 have been used in the seawater to which the gametophytes have been transferred.
