

Producer Name: \_\_\_\_\_

## MULTI-INGREDIENT ORGANIC PRODUCT PROFILE

(Please use a separate form for each multi-ingredient product you wish to certify).

**1: Product Name:** \_\_\_\_\_

### **2: Product Composition\***

A. Product will be sold, labeled or represented as (check one):

- 100% Organic     Organic     Made with Organic \_\_\_\_\_  
 <70% Organic     Organic By-product

B. Ingredient Documentation:

Ingredient	Supplier	% of Total	Certifier of Supplier

Please attach additional sheets if more space is needed.

**\*Notes: Salt** - Anti-caking agents in salt are not allowed. You must obtain a 'Specification Sheet' or other documentation which indicates whether salt, used as an ingredient above, contains any ancillary ingredients that must be reviewed for compliance with the NOP regulations.

**Non-Organic Non-Agricultural Ingredients** – These ingredients (e.g. yeast, bicarbonate of soda) and processing aids (e.g. diatomaceous earth) must be listed in section 205.605 of the "National List of Allowed and Prohibited Substances" and may require additional verification documentation. Please contact MCS if this product contains such ingredients.

**Non-Organic Agricultural Ingredients** – If your product will be labeled as "organic" and it includes any non-organic agricultural ingredients, they must be listed in section 205.606 of the "National List of Allowed and Prohibited Substances" and you must document that the ingredient is not commercially available in the form, quantity or quality needed. For "organic" and "made with organic" products you must verify such ingredients are produced without the use of excluded methods, sewage sludge and ionizing radiation. Please contact MCS if you intend to use any non-organic agricultural ingredients.

C. How are ingredient percentages determined?

- By Solid Weight     By Liquid Weight     By Solid & Liquid Weight

D. List all processing aids used in the production of this product:

### **3: Labeling – Please attach copies of proposed labels for approval by MCS before printing.**

MOFGA Certification Services only reviews labels for compliance with organic labeling standards defined in USDA-NOP 7 CFR part 205. The use of certain ingredients or certain marketing claims, such as health or origin, may be subject to other Federal or State regulations. It is the responsibility of the certified operation to apply all applicable laws and regulations in the formulation and labeling of products.

- 1) Will the Certified Organic by MOFGA logo appear on the label?     Yes     No  
2) Will the USDA logo appear on the label?     Yes     No
